

MOBILE TELEPHONY

WHO TAKES OVER THE RESPONSIBILITY?

In 1932 already it was known that electromagnetic radiation (microwave and cell phone radiation) is endangering health and leading to depression, headache and nervous states of exhaustion. This has been proven through unambiguous studies since the early 60's. Despite that, this technology has been introduced everywhere since the 1990's.

Deutsche Medizinische Wochenschrift, Oct 5, 1932, Ulrich Weiner, Funktechniker, AZK, Feb. 23, 2008 in Chur (CH), www.anti-zensur.info

Shortly after the introduction of the first digital cellular network in 1997 in Switzerland there was a sudden rise of psychic illnesses, disorders of the nervous system and sensory organs and of the metabolism. In the meantime it has become official that after 10 years of cellular phone usage one has to expect a roughly three times higher risk of cancerous brain tumors.

*Ulrich Weiner, radiocommunication technician, AZK Feb 23, 2008 in Chur (CH), www.anti-zensur.info
Gerd Oberfeld, Landessanitätsdirektion Salzburg (A), TV-show "plus+punkt" of Rai Radiotelevisione Italiana*

The first cellular network, which was introduced in Germany in 1992, had 800 transmitters. In the meantime there are 120,000 of them. That is a growth rate of 15,000% !! And still more transmitters are being set up. There are already about 6% of Germany's population who are radiation sensitive – tendency strongly increasing. If this trend continues, in the year 2017 there will be already 50% of the population who are radiation allergic, burdened with extreme disadvantages in the everyday life, according to studies.

Ulrich Weiner radiocommunication technician, AZK Feb. 23, 2008 in Chur (CH), www.anti-zensur.info

MOBILE TELEPHONY - WHAT IS IT, HOW DOES IT WORK?

Cellular radiation is part of the group of microwaves. Similar to a microwave oven the interdependency of this radiation is especially strong with water and proteins – actually exactly with those substances, which our body is made up of. That means that microwave radiation has an over average influence on our body!

Living body cells "communicate" with each other through electrical and chemical processes. But microwaves permanently interfere with this communication as a jamming transmitter. As a result, biologically misguided reactions are triggered. During the cell phone calls red blood cells, for instance, carry less oxygen. This results in a headache. Since microwave radiation penetrates almost all solid bodies, the effect is compulsory radiation, which no one can escape.

PM, 29.10.08, Wilfried Kühling, Vorsitzender des Wissenschaftlichen Beirats des BUND

The basic strain within the body caused by cellular radio waves is increased many times because the radiation is "pulsed" in order to be able to transmit many calls at the same time on the same frequency. The effect is similar to the one where one had to stay in a constantly flickering "disco-light." The effect: a change of the brain currents and of the central nervous system.

Prof. Dr. Ross Adey, Loma-Linda-Universität, California

Damage through cellular communication like brain tumors, the alternations in the blood, cancer, genetic malfunctions and other problems are proven. In scientific trials human blood was put into test tubes and then radiated with microwaves, which are similar to cellular radiation. It was shown that under the influence of radiation fields the cell nuclei are split.

Dr. George Carlo, Medizin-Physiker, USA

Further effects of the cellular communication: This radiation can mess up the hormones of the body. So, for instance, the sleeping hormone "melatonin" is affected, but there are also much more stress hormones discharged. The effects are sleeping disorders up to depressions, unrest and feelings of panic. It is also proven that cellular radiation fields have a cancerous effect, cancer develops much severer and faster than is usual under the influence of these fields. After more than 10 years of cellular phone usage the risk of brain tumors is increased anywhere from 20% up to 200%.

begin to end
the day we
become silent
about things
that matter."**

Martin Luther King

CELLULAR COMMUNICATION - ENJOYMENT OR FATAL DESTINY?

Research shows that the radiation of cellular phones opens up the blood-brain barrier and this way many poisons can get into the brain much faster. Medicals and other pollutants that under normal circumstances wouldn't pass this barrier now find their direct and unhindered way into the brain – with effects that are unpredictable. The longer a blood-brain barrier is exposed to pulsed microwaves the more permeable it becomes. In a laboratory test with brains of rats after two days it already became obvious, after four it became even more clear.

Prof. Leif Salford, Neurochirurg der schwedischen Universität Lund

Prof. Dr. Joh. Goeke, Fachhochschule Köln; und Dr. Florian Stögbauer, Neurologe an der Universitätsklinik Münster, Juni 2001

Since the introduction of cellular communication in Europe the consumption of Ritalin® has drastically increased. Ritalin is a strong drug, which affects the psyche and sedates people. It is especially given to people with ADD. Among those affected there are a particularly large number of children and young people. Critics rate Ritalin as a very dangerous drug, just like heroin, but only more perfidious. This is especially the case among children.

Ulrich Weiner, Funktechniker, AZK 23.02.2008 in Chur (CH), www.anti-zensur.info

Dr. Brigitte Lange, physicist, says that in 20 years we would be a people with dementia, for even in the stand-by mode a cellular phone opens up the blood-brain barrier. Under normal circumstances it is closed and prevents illnesses like Alzheimer, dementia, multiple sclerosis and Parkinson.

Dr. Brigitte Lange, Physikerin, Heidelberg, Jan. 2001

Also the environment isn't spared. The radiation exposure everywhere across the earth causes the death of trees, miscarriages with livestock and bees lose their orientation – with devastating consequences for the agriculture.

Dr. Ulrich Warnke in seinem Buch „Bienen, Vögel und Menschen – Die Zerstörung der Natur durch Elektromog“

MOBILE TELEPHONY – THRESHOLDS AND LIMITS

Because distorted reactions in the cells already appear underneath the valid thresholds, the European Environment Agency concludes: "The maximum radiation thresholds are insufficient." The German radiation thresholds are a trillion times above the natural existence of such radiation. DNA breaks appear already with approximately a fortieth of the radiation thresholds. And then our politicians say the radiation thresholds were safe ...

*Bioinitiative Report vom 31.08.2007 / TV-Sendung „Mobilfunk und Gesundheit“, Report Mainz Dr. med. Hans-Christoph Scheiner, AZK 23.02.2008 in Chur (CH), www.anti-zensur.info
Prof. Franz Adlkofer, UMTS Studie 2007*

Asked the question why the radiation thresholds in Germany aren't altered despite the danger, Prof. Jürgen Bernhardt, who for many years has been a member of the committee "Non-Ionising Radiation," working in the Bundesamt für Strahlenschutz (the German department responsible for issuing permissions for usage of electromagnetic radiation devices) and advisor of all environmental ministers of the recent governments: "When you follow any hypothesis and lower the radiation thresholds then you ruin the economy." Prof. Jürgen Bernhardt is mainly responsible for the invention of the radiation thresholds and their acceptance through the German parliament!

Dr. med. Wolf Bergmann, 26.02.2008, Kompetenzinitiative zum Schutz von Mensch, Umwelt und Demokratie

MOBILE TELEPHONY - ABOUT VICTIMS AND OFFENDERS

Mobile telephony is an attack on all life. All of us are the ones suffering because there are hardly any radiation free areas left. We are surrounded by a completely seamless cellular network as well as by cell phone users all around us. Thus we become passive cell phone users without even wanting it. The damage is dependant upon the amount of time one is exposed to the radiation.

Children are particularly affected, especially those who have been exposed already in the mother's womb. Remember the children! There is only one solution to dealing with this technology – absolute and radical abstinence! There is no other solution to escape the devastating consequences of this technology!

Ulrich Weiner, Funktechniker, AZK 23.02.2008 in Chur (CH), www.anti-zensur.info

Humboldt*

NOW WE KNOW IT: WHOEVER DOES NOT ACT, SHARES THE GUILT

How to act? Copy this piece of writing as many times as possible and distribute it, take part in demonstrations, learn more about it, enlighten others, file suit against offenders, enter associations who fight against it, etc.

The only thing important to the **cell phone industry** is the money and nothing besides. **And politics?** Do they stand in for the wellbeing of the people? The answer is obvious to everyone, if we look at the increase in number of cellular networks and microwave transmitters.

The cell phone industry and the guilty politicians definitely have to be called to account.
